

CALL FOR PAPERS

We invite the community to submit short and full papers. Submissions must be original and follow the conference formatting guidelines. Upload in PDF via EasyChair.

THEMES

Environmental Modeling and Simulation
Hydrological and Hydraulic Modeling
Computational Fluid Dynamics in Environmental Systems
Water Quality Modeling
Ecological Modeling and Conservation
Climate Change Modeling and Impact Assessment
Numerical Methods for Environmental Applications
Geospatial Analysis and Remote Sensing
Wastewater Treatment Modeling
Environmental Data Analysis and Big Data
Energy and Resource Efficiency
Renewable Energy Systems Modeling
Modeling of Socio-Ecological Systems
Sustainable Urban and Regional Development
Pollution Dispersion and Control Modeling
Open Data for Environmental Monitoring
Risk Assessment and Environmental Management

ABOUT

The Symposium is aimed at undergraduate and postgraduate students who wish to present their research work, share ideas, and engage in discussions on advances in biosystems modeling and simulation
